

where **accurate** is not
precise enough!

where **accurate** is not
precise enough!

What we do:

- Manufacturing of high precision mechanical parts to specification.
- Typically, high volumes(100k – 1M pcs/y).
- Dimensions from 0,1 mm to 50 mm
- Accuracies from 1 μ . Highly precise and consistent.
- 100% Dutch company, situated in the North of the Netherlands
- Founded in 1990, 19 fte (30% in QA)
- 3 M Euro, 30% targeted yearly growth for the next five years

- High precision mechanical parts
- Mostly moving headstock turning
- Diameters from 0,1 mm
- Accuracy from 1 μ
- Batches 1 K – 1 M yearly
- Healthcare
- Defense
- QMS
- ISO 9001
- AS9100D pending
- NIST – Traceable measurements
- Tactile & Optical measurements

where **accurate** is not
precise enough!

Machinery

- 10 mainly Swiss-type, CNC precision lathes for small parts with highest accuracies.
- Micro Pulsating Electro Chemical Machining (PECM) unit for low Ra and high surface integrity.
- Precision wire EDM for parts with roughness below 0,2 Ra using a wire diameter of 0,07 mm.
- Finishing department for dry and wet precise finishing.

Quality control

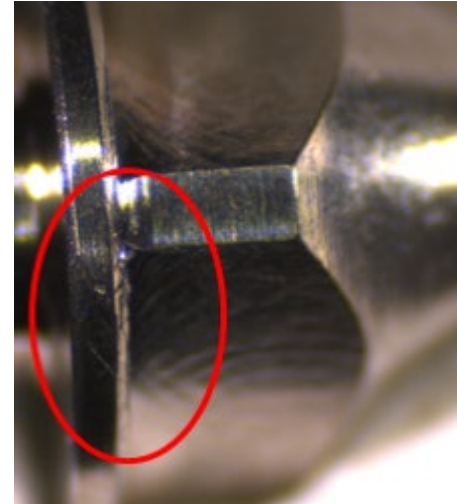

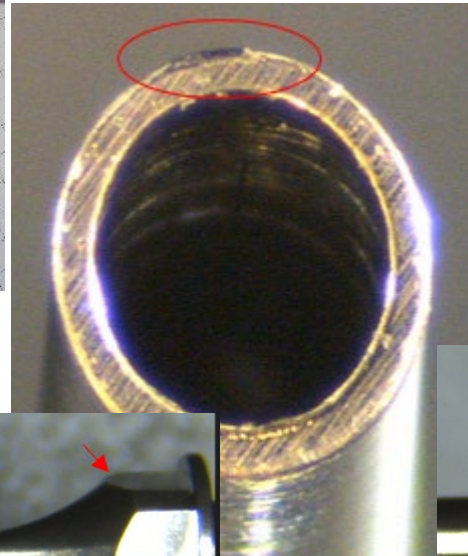

- We guarantee highest quality standards.
- Staff with medical and defense history well understand needs for traceability and consistency.
- Quality staff adequately manned and equipped for up to 100% inspection of produced parts.
- We are able to adopt customers (medical) quality regulations into our daily process.
- ISO 9001:2015 certified quality management system
- Ultramodern measuring room

Transparent partnership

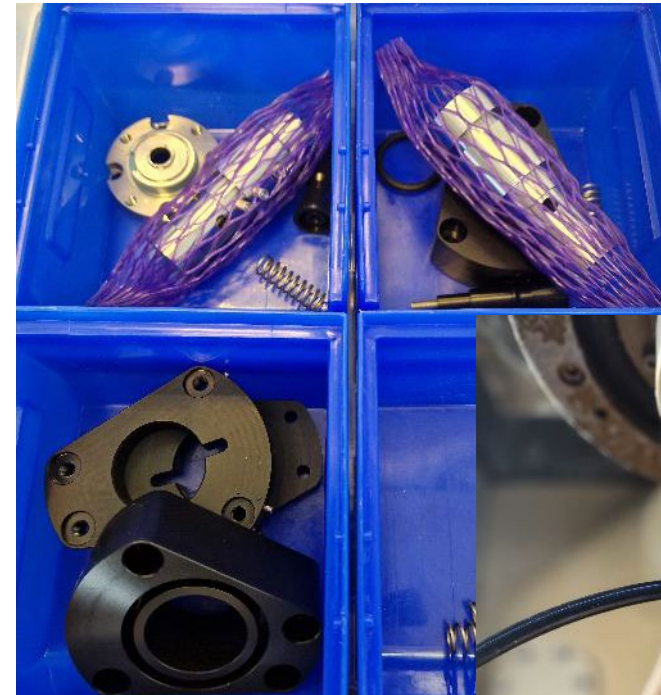

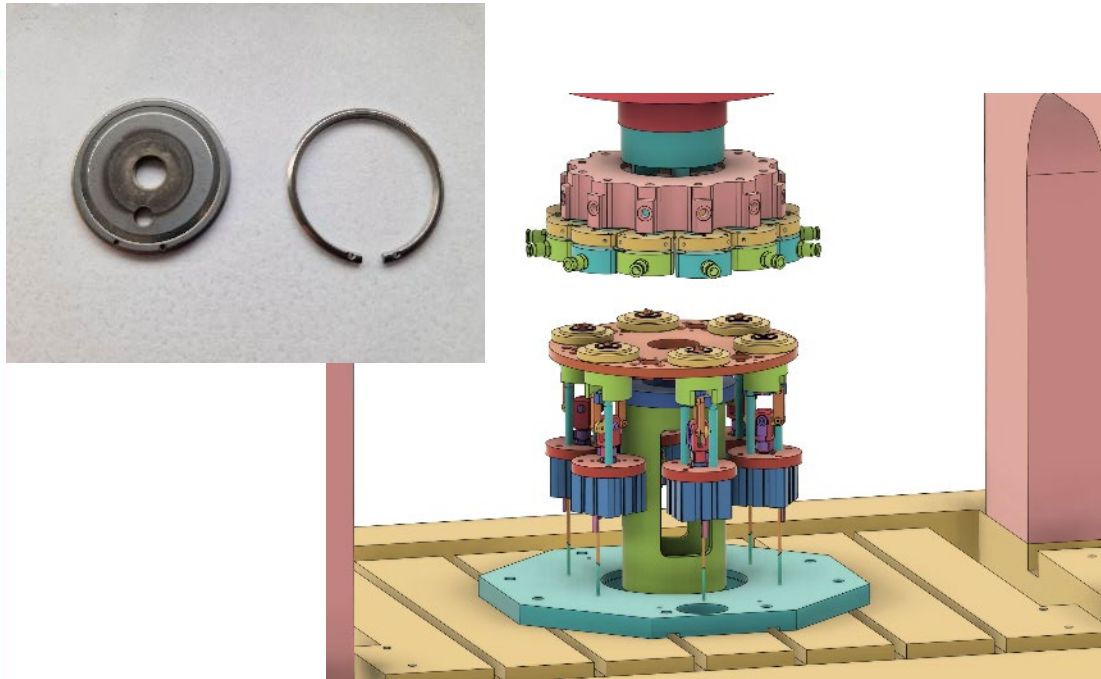

- We offer our knowledge to improve cost effectiveness on production and pricing.
- It is in our nature to challenge existing design vs makeability.
- Whether custom fastener, electric connector or complex medical instrument component,
- Whether made of standard stainless steel, titanium alloy or (medical) polymer,
- **EXAKT** is your partner where **accurate** is not **precise** enough

where **accurate** is not
precise enough!

where **accurate** is not
precise enough!
